

Scanning Books for Record Requests

Written By: Caleb Harris

Edited By: Krystal White and Stephanie Kinsler

When submitting requests for bibliographic records, staff can upload scans/images of the title page and the verso into the form. This helps the catalogers ensure that the most accurate record is created/selected and uploaded when adding new books to your library's collection. The form accepts a wide variety of file types for these scans/images and allows **5 files per request**.

Using the scan to document feature on your library's scanner, scan the title page (or cover if there is no title page) and the verso (copyright page) into one pdf document. Try to keep the book as flat as possible, without damaging the spine, this will create a more readable scan.

TIP: When creating the document, name it something related to the book, such as the author's name or part of the title, for easy identification.

Once the title/verso page of the book has been scanned, it's time to upload it to the form!

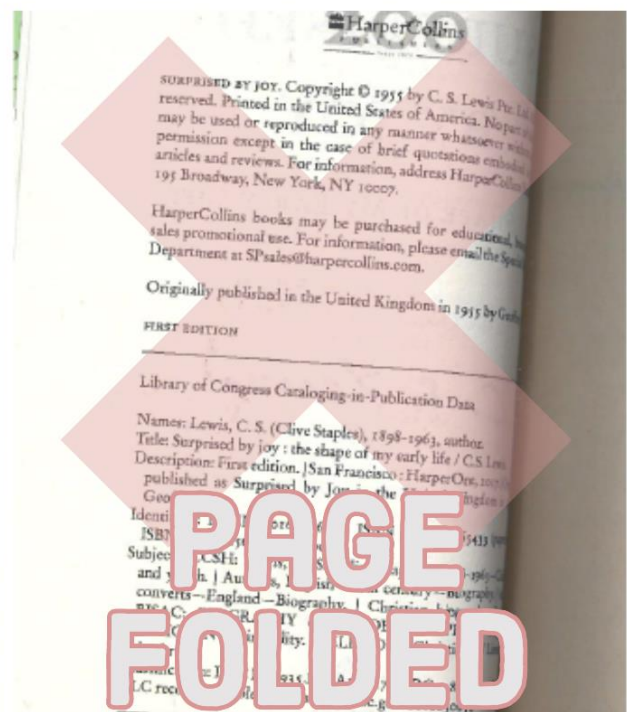

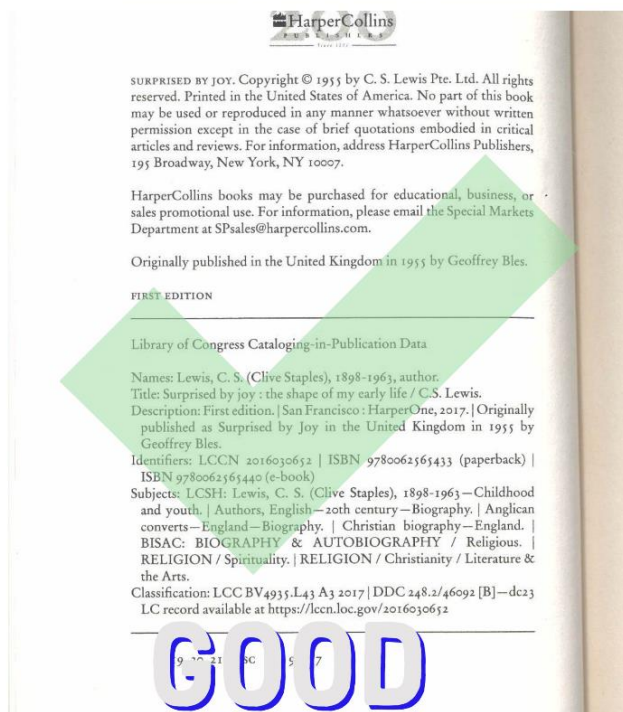

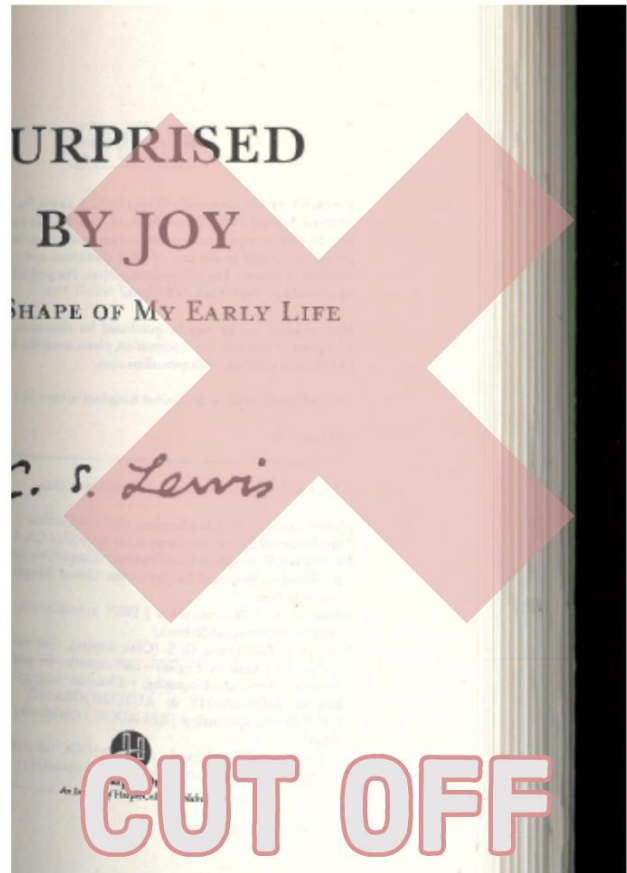

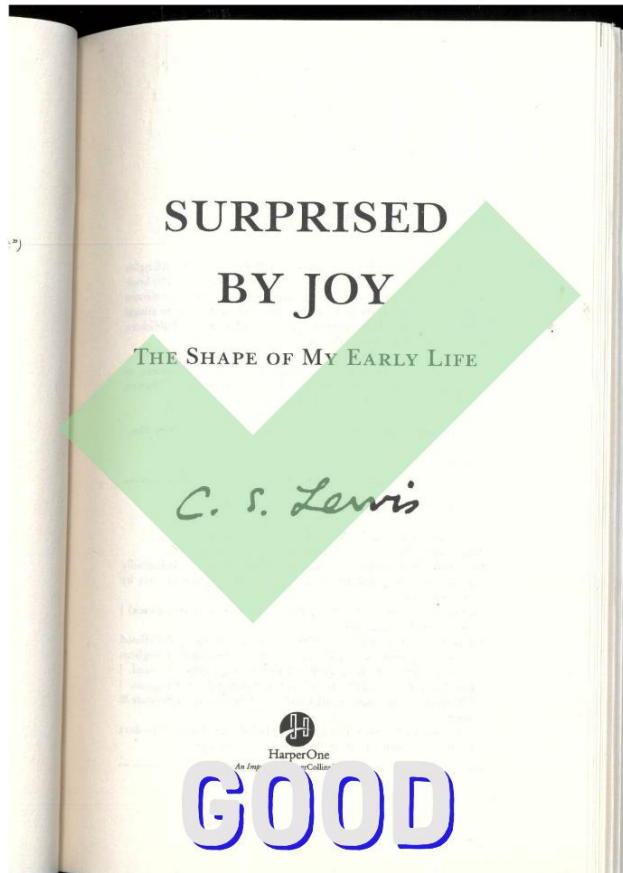

1. Copy and paste the file from your local desktop to the remote one. Right click to copy and paste or use the CTRL+C (copy) and CTRL+P (paste) to paste the document.
2. Next, click on "Browse" next to the Upload button and find the file on the computer.
3. After finding the file, click "Open" and then the "Upload" button. The text will turn blue when it has been successfully uploaded.
4. Continue filling out the form as normal and submit the request.

The key to this new process is to make sure that the scans are readable for the catalogers. This enables them to easily and quickly find or create the record you need so you can start circulating new collection items.

In the case of not having access to a scanner, a smartphone app can be used. Most scanning apps will automatically create PDF files for you and allow you to transfer them to your computer.

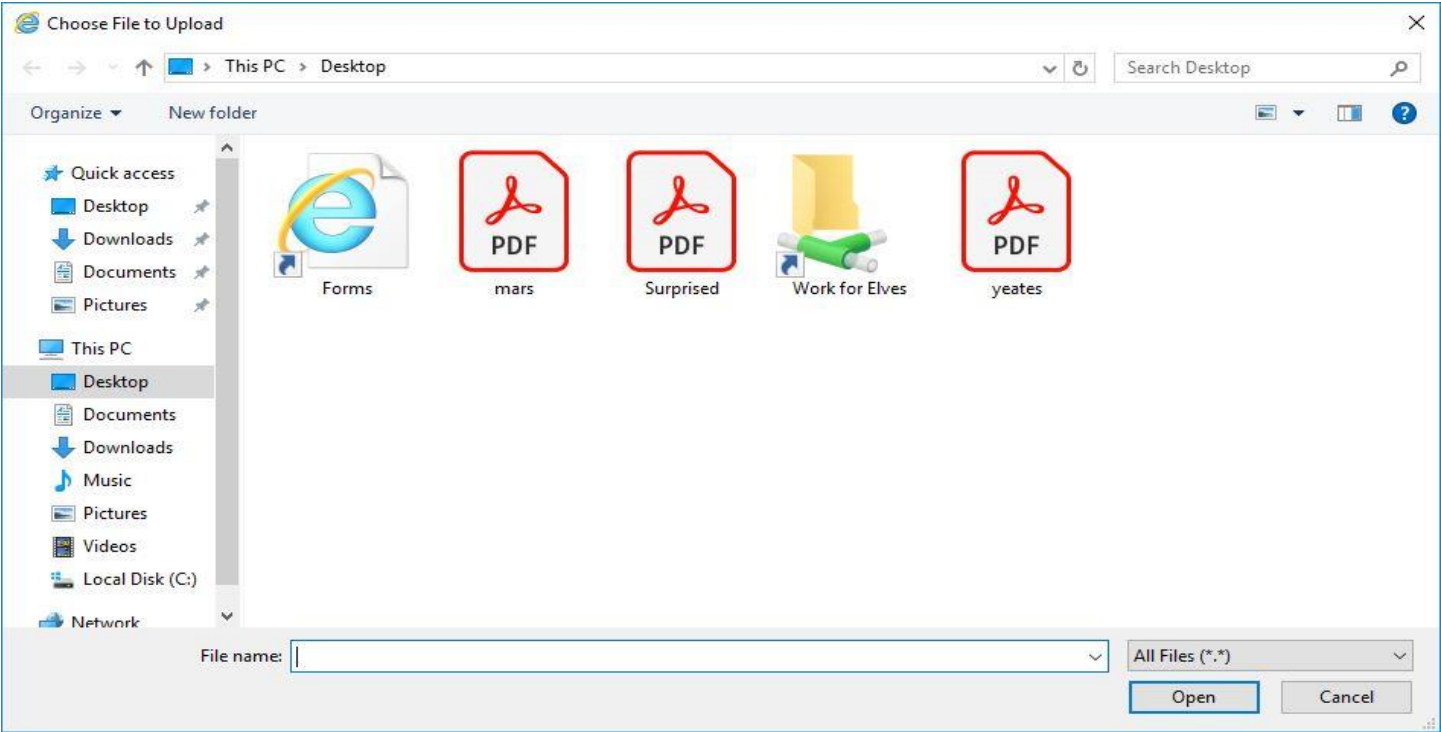

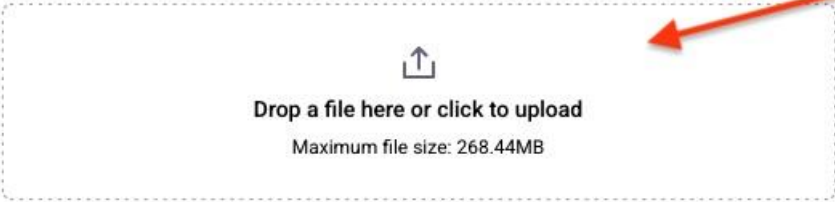

Below are some example photos of the dos and don'ts along with some screenshots for the upload process.

WHEN SCANNING

Optional Upload Attachment (Title page, back of title page, front and back covers, insert)

Cataloging finds this very helpful. [See Instructions here.](#)
